
Accelerated gate two queries process

Strategic solution(s)	Southern Water Havant Thicket B4 & Water Recycling B5
Query number	SRN001
Date sent to company	16/12/2021
Response due by	20/12/2021

Query

Please provide the following technical reports:

Technical Report 1 – Review of Pipeline Watercourse Crossings

Technical Report 2 – BNG & NCA

Technical Report 4 – HRA WRP Marine Consenting Risks

Technical Report 5 – Air Quality Assessment

Technical Report 6 – Ornithology and Noise Assessment

Carbon Assessment

Memorandum – W4L-H Water Recycling Plant Wastewater Discharges

Solution owner response

Technical Reports 1, 2, 4, 5 & 6 have been uploaded to the portal as requested.

The Carbon Assessment is not a standalone document, although we have provided a document (SRN001 – Carbon Memo) which provides a summary of the

assessment completed. This is also captured and reflected within our submission documentation. For Water Recycling options, this is held in Section 2.10.6 of Annex 2 Water Recycling Technical and summarised in Section 3.4.10 of the respective Conceptual Design Report. For Havant Thicket options, this is held within Section 2.10.6 of Annex 3 Havant Thicket Technical and summarised in Section 3.5.6 of the respective Conceptual Design Report.

Memorandum – W4L-H Water Recycling Plant Wastewater Discharges has been shared with the EA and Natural England on three occasions since 6th October 2021. This is attached again as requested.
